

REUSABLE TAG WITH DISPOSABLE STRAP APPLICATION

Step 1

Push the strap through the top of one of the slots on the chip, then through the other slot so that the strap passes underneath the tag. Pull the chip down the length of the strap until the “bow tie” section of the strap is directly under the tag.

Step 2

Now, place the strap snugly around your ankle with the tag on the **outside** of your ankle. Fasten the strap by placing one of the cutouts over the white pin, then folding over the small flap and snapping the circular plastic piece onto the pin over the strap.
