

# REUSABLE TAG WITH DISPOSABLE STRAP APPLICATION

## Step 1

Push the strap through the top of one of the slots on the chip, then through the other slot so that the strap passes underneath the tag. Pull the chip down the length of the strap until the chip is about two inches from the strap's clasp.

## Step 2

Now, place the strap snugly around your ankle with the tag on the **outside** of your ankle. Fasten the strap by placing one of the cutouts over the black pin, then folding over the small flap and snapping the circular plastic piece onto the pin over the strap.
